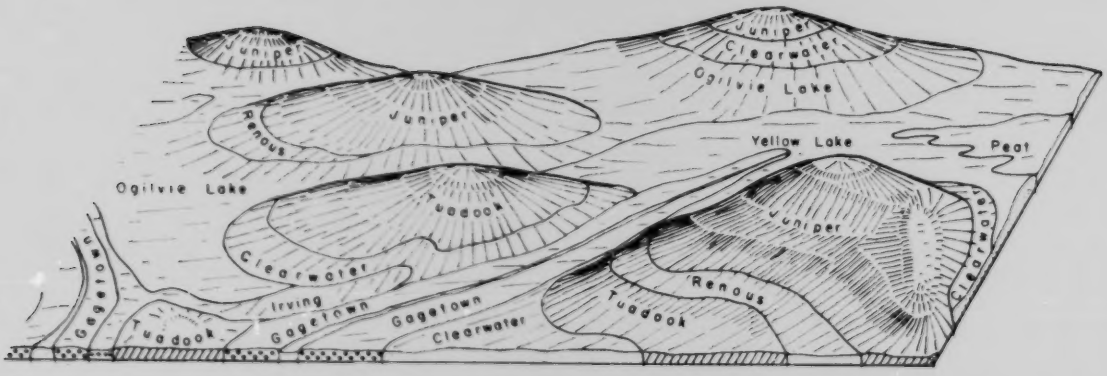
Bibliography of Soil Survey and Related Works in Atlantic Canada

1985

Bibliographie sur l'étude pédologique et oeuvres connexes au Canada atlantique



Published by Authority of the
Atlantic Provinces Agricultural
Services Coordinating Committee

Prepared by Advisory
Committee on Soil Survey

Publié avec l'autorisation du
Comité coordinateur des services
agricoles des provinces atlantiques

Préparé par le Comité
consultatif d'étude
pédologique

Preface

This bibliography was compiled by the Advisory Committee on Soil Survey. It contains selected references to literature on soil survey, soil characterization, technical operations manuals and related information for Atlantic Canada. Both published and unpublished materials are referenced.

Publications often cover more than one topic, in which case they are classified under their principal topic. The Agriculture Canada Libraries Division, supplemented by personal reference lists of soil scientists in the region, served as the main sources of literature.

Most publications are readily available from the publisher listed in the reference. However, should assistance be required to locate a given reference, please feel free to contact one of the soil survey offices in the province of concern. A complete listing of these offices is presented on page iii.

This biennial publication contains the most up-to-date reference list available at the time of printing. Revisions and additions for future editions should be sent to Herbert W. Rees, L.R.R.I. Soil Survey Unit, Agriculture Canada, P.O. Box 20280, Fredericton, New Brunswick, E3B 4Z7.

Editors: H.W. Rees (N.B., editor-in-charge)
A. Stewart (Nfld.)
C. Veer (P.E.I.)
K. Webb (N.S.)

Acknowledgements

The editors wish to thank the many soil scientists in the region who willingly participated in the compilation of this document.

French translation was performed by H.J.A. Cormier, Agriculture Canada, Fredericton Research Station.

Grammatical editing was done by R.M. Anderson, Librarian, Agriculture Canada, Fredericton Research Station.

Préface

Cette bibliographie fût compilée par le Comité consultatif d'étude pédologique. Elle contient des références de choix sur la littérature disponible sur l'étude pédologique, la caractérisation des sols, les manuels d'opérations techniques et l'information connexe pour le Canada atlantique. La liste de références tient compte autant de la matière non-publiée que de la documentation publiée.

Il arrive souvent que certaines publications traitent de plus d'un sujet de discussion. Dans un tel cas, elles sont classées sous leur sujet principal. La division des bibliothèques d'Agriculture Canada a servi de source principale de littérature sur le sujet avec, en plus, des références supplémentaires provenant des listes personnelles des rechercheurs en sols de la région.

La plupart des publications sont facilement disponibles des éditeurs mentionnées dans la liste de références. Toutefois, au cas où quelqu'un aurait besoin d'aide pour trouver une référence quelconque, cette personne devrait communiquer avec les bureaux des équipes de prospection pédologique de la province en question. Une liste complète de ces bureaux se trouve sur la page iv.

Au moment de mettre sous presse, cette publication contient la plus récente liste de références disponible. Toutes additions et révisions destinées à des éditions ultérieures devraient être envoyées à Herbert W. Rees, Equipe de prospection pédologique, Institut de recherches sur les terres, Agriculture Canada, Station de recherches, C.P. 20280, Fredericton, Nouveau-Brunswick, E3B 4Z7. Tél: (506) 452-3260. L'addendum sera publiée bisannuellement.

Rédacteurs: H.W. Rees (N.-B., rédacteur en chef)
A. Stewart (T.-N.)
C. Veer (I.P.E.)
K. Webb (N.-E.)

Remerciements

Les rédacteurs aimeraient remercier les nombreux rechercheurs en sols de la région qui ont volontairement participé à la compilation de ce document.

La traduction de l'anglais au français fut faite par H.J.A. Cormier, Agriculture Canada, Station de recherches, Fredericton, N.-B.

La revision grammaticale fut faite par R.M. Anderson, bibliothécaire, Agriculture Canada, Station de recherches, Fredericton, N.-B.
